

VENOM Security Assessment Report

Attack Surface Assessment

TARGET ENVIRONMENT

<https://zeroops.in>

ASSESSMENT DATE

18/8/2026, 1:05:56 pm

OVERALL RISK RATING

MEDIUM

SECURITY POSTURE SCORE

98 / 100

Executive Summary

AI GENERATED

Scan Overview

Security assessment for <https://zeroops.in> identified 0 Critical, 0 High, 1 Medium, 0 Low findings. The overall posture requires attention to mitigate potential exploit vectors in production.

Overall Posture Score (CVSS Grounded)

MEDIUM RISK

Threat Actor Narrative

Observed risk signals for <https://zeroops.in> include missing-header-content-security-policy (MEDIUM): Security Header Missing.

No stronger multi-step chain is supported beyond the observed findings. Prioritize direct remediation and re-test each issue. [Finding IDs: missing-header-content-security-policy]

This analysis describes risks supported by the findings above. Additional vulnerabilities may exist that require deeper or authenticated testing to identify.

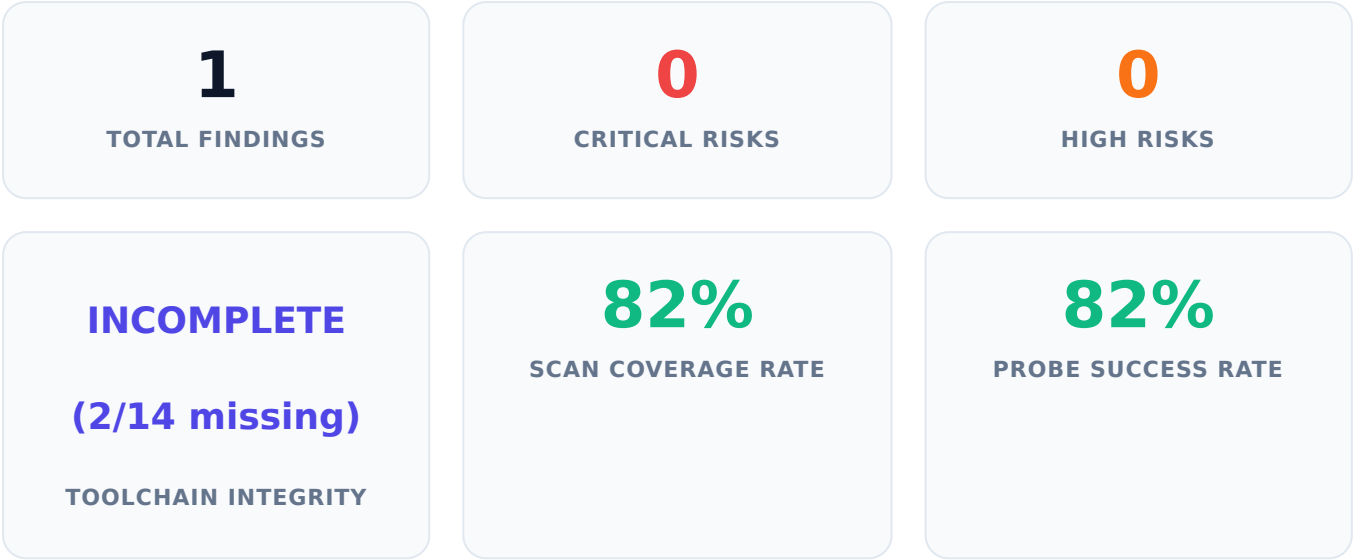

Business Impact Estimates

Estimated remediation effort: Medium effort (4-16 hours) depending on infrastructure complexity.

Typical breach costs in similar categories: ₹20L-₹5Cr depending on data sensitivity and regulatory exposure.

Estimates are based on CERT-In 2024 guidelines and are intended for CFO advisory purposes. Actual costs depend on organization-specific infrastructure, data classification, or regulatory obligations.

Scan Execution Metrics

Tool Execution Timeline

TOOL ID	TYPE	STATUS	DURATION
hardened_report_generation	Automated Probe	SUCCESS	100ms
ai_app_scan	Automated Probe	SUCCESS	100ms
container_security_scan	Automated Probe	SUCCESS	465ms
api_security_scan	Automated Probe	SUCCESS	74354ms
supply_chain_scan	Automated Probe	NOT_APPLICABLE	100ms
secrets_scan	Automated Probe	NOT_APPLICABLE	100ms
sqlmap_detect	Automated Probe	TOOL_NOT_INSTALLED	470ms
nikto_scan	Automated Probe	TOOL_NOT_INSTALLED	471ms
tls_metadata_probe	Automated Probe	SUCCESS	741ms
dns_lookup_probe	Automated Probe	SUCCESS	714ms
http_headers_probe	Automated Probe	SUCCESS	2481ms

Findings Summary

REF	FINDING DESCRIPTION	SEVERITY	EXPLOIT PROB. (EPS)	CATEGORY
#1	Security Header Missing	MEDIUM	45%	header-hardening

Vulnerability Details (Developer View)

#1: Security Header Missing

MEDIUM

EPS: 45%

CONFIDENCE: WEAK

DESCRIPTION

CSP is not present, reducing browser-side mitigation for script injection classes.

DISCOVERY VECTOR

HTTP header probe: GET request sent to target URL, response headers analyzed for security directives and header hardening coverage.

EVIDENCE & TRACE

Request: GET https://www.zeroops.in/ | Response: HTTP 200 in 1541ms.

REPRODUCTION STEPS

- curl -sS -D - -o /dev/null 'https://www.zeroops.in/'

VALIDATION STATUS

Manual validation recommended before treating as confirmed vulnerability.

Remediation Steps

Define a least-privilege Content-Security-Policy and deploy with report-only rollout first.

Compliance Mapping Scorecard

OWASP Top 10 Mapping

Category	Reference	Status
Security Misconfiguration	A05	1 GAPS

Regulatory & Cyber Standards

Standard	Compliance Metric	Status
PCI-DSS v4.0	Requirements 1.3, 3.5, 6.3.3, 7.2	PASSED
HIPAA Security Rule	Safeguards 164.312(a)(1), 164.312(c)(1)	PASSED
CIS Controls	Foundational Security Controls (1-7)	CIS SCORE: 98%

Fix Roadmap (Prioritized Remediations)

Week 1 Priority (Immediate Fixes)

Address all critical and high findings to plug active exploit routes.

✓ No immediate fixes required in this category.

Month 1 Priority (Short-Term Hardening)

Address medium configuration and posture vulnerabilities.

- **#missing-header-content-security-policy:** Security Header Missing

Quarter 1 Priority (Long-Term Hygiene)

Address low-severity exposures and align with continuous security validation schedules.

✓ No hygiene fixes required in this category.

Evidence & Integrity Records

SHA-256 Digest: **f266c3de1d46983a4a9a8acc29f58b29c65327aebdef9749e171b53346b91ec1**

Proof of Authorization Check: **PASS**
